

Faculty of Agriculture UGM  
Present

# SC-SOBA 2021

24 June- 20 August 2021

A virtual Summer Course on  
Smart-Eco Bioproduction  
Agriculture

The Nexus Between Local-Ecological  
and Modern Agricultural Practices

## Course Description

This Course is designed to provide students with a better understanding of the various agricultural practices, both with the nature of the local ecological as well as modern scientific. We will explore the relationship and nexus and between the local ecological and modern agricultural practices, which in some parts of the world, including in Indonesia, are made as government policy to promote sustainable agricultural practices. Despite that, we will also identify and analyze the weaknesses and threats surrounding the interlinkage between the local ecological and modern agricultural practices, in order to be able to propose strategies to improve the smart eco bio-production agriculture.

## Course materials

Case based learning approach, with course materials:

1. Ethno-Agronomy
2. Biodiversity in agriculture and fishery
3. Smart-tech agriculture
4. Biotechnology
5. Conservation in agriculture and fishery
6. Organic agriculture
7. Agroforestry

## Participant

- Undergraduate (preferably 3rd or 4th)
- Postgraduate Student
- Both International and domestic students from Indonesia

**Course Enrollment is Free**

Registration:  
1 April - 1 June 2021

**REGISTER AT**
