

Yamagata University Faculty of Agriculture's Graduate Students Research Presentations

International Education involves easy communication among researchers in a common language and multidisciplinary research exposure to nurture flexibility for problem solving, providing them with a wide a range of approaches and to the ability to create or use networks of researchers to do it. Access to other research disciplines than one's own offers an open door to multiple approaches that can be applied to deal with present and future challenges of agricultural and forestry sciences. Thus, a seminar style presentation within the Faculty of Agriculture will contribute to the International Education of Graduate students between the different laboratories with the aim to promote inter-disciplinary research among students and/or laboratories.

We expect that these seminars will broaden the research scope of graduate students by exposing them to other students' research fields as well as present and discuss their own research results and improve their presentation skills.

Schedule

From July 2021 to February (except in August), two research presentations per seminars will be organized every two weeks. The seminars will be held online. The presentations will be in Power Point or PDF format. The students presenting will submit an abstract previous to the presentation in order to keep a record of all the presentations for the year 2021.

<i>Seminars</i>	<i>Date</i>	<i>Seminars</i>	<i>Date</i>	<i>Seminars</i>	<i>Date</i>
Seminars 1	15 July 2021	Seminars 6	21 October 2021	Seminars 11	13 January 2022
Seminars 2	29 July 2021	Seminars 7	11 November 2021	Seminars 12	27 January 2022
Seminars 3	9 September 2021	Seminars 8	25 November 2021	Seminars 13	10 February 2022
Seminars 4	23 September 2021	Seminars 9	2 December 2021	Seminars 14	24 February 2022
Seminars 5	7 October 2021	Seminars 10	16 December 2021		

In total 14 seminars and 28 presentations will be made from July 2021 to February 2022.

Thursday 3:00PM
